About Greenfuel

Where Tradition Becomes Tomorrow

OUR PHILOSOPHY

**Rooted in Tradition.
Refined by Science.**

A Journey Back to Our Roots

Tradition x Science - The Perfect Balance

1. Page Objective & Source Basis

The About Us page should explain why Greenfuel exists, what it believes, and how it combines India's traditional beauty wisdom with modern scientific research. It must feel like a premium editorial journey rather than a corporate company profile.

- Preserve the central brand story: Greenfuel reconnects modern lifestyles with India's authentic heritage of natural wellness and beauty.
- Communicate that Greenfuel does not position tradition as outdated; it belongs in everyday life.
- Show the relationship between Ayurvedic wisdom, traditional Indian rituals, botanical ingredients, modern scientific research, manufacturing practices, and quality standards.
- Do not turn the page into an e-commerce product grid.
- Do not introduce unsupported company statistics, awards, certifications, laboratories, founders, dates, or medical claims unless the client supplies them.
- Keep the tone minimal, elegant, scientific, and authentically Indian - never rustic or village-like.

Approved brand positioning to preserve

*Greenfuel is where ancient rituals meet modern science; where authenticity meets innovation; where purity meets performance. The brand story closes with: **Rooted in Tradition. Refined by Science. Inspired by Nature.***

Recommended route

/about-us

2. Exact About Us Page Layout

Section 1 - Cinematic About Hero

A premium full-width first impression with one strong lifestyle/ritual visual rather than a busy collage.

- Eyebrow: ABOUT GREENFUEL
- Main heading: About Greenfuel
- Secondary line: Where Tradition Becomes Tomorrow
- Supporting copy should introduce Greenfuel as a tribute to India's timeless wisdom and its meeting point with modern science.
- Visual direction: morning light, copper vessels, herbs, glass bottles, natural textures, one Greenfuel product if appropriate.
- Desktop height: approximately 620-760px depending on final navigation/header.
- Use any suitable dummy image from the local assets folder for now.
- Do not add product price, discounts, badges, sale messaging, or promotional popup.

Section 2 - Our Philosophy

A clean editorial split layout that establishes the brand's worldview immediately after the hero.

- Left: large ritual/botanical image.
- Right: label OUR PHILOSOPHY.
- Heading: Rooted in Tradition. Refined by Science. Inspired by Nature.
- Supporting content should explain balance between body and mind, nature and nurture, tradition and innovation.
- Below the text, use 3-4 small philosophy pillars such as Ayurvedic Wisdom, Modern Science, Purposeful Formulation, Holistic Approach.
- Do not claim 'clinical' or 'dermatologically tested' unless evidence is supplied.

Section 3 - Our Story: A Journey Back to Our Roots

This is the emotional storytelling section based on the supplied official Greenfuel story.

- Use a deep forest-green or dark charcoal text panel paired with a warm Indian landscape/ritual visual.
- Explain that beauty once came from turmeric, sandalwood, coconut oil, hibiscus, aloe vera, and herbs prepared through generations of wisdom.
- Include the key turning point: generations, fashion, and technology changed, but traditions remained timeless.
- State that this realization became the birth of Greenfuel.
- Preserve the mission: reconnect modern lifestyles with India's authentic heritage of natural wellness and beauty.
- Do not invent a founding year, founder biography, or company history not present in the source.

Section 4 - Tradition x Science: The Perfect Balance

Make this the visual signature of the About page.

- Center heading: Tradition x Science - The Perfect Balance.
- Left side: The Wisdom of Ayurveda - time-tested herbs, rituals, botanical knowledge, traditional understanding.
- Right side: The Power of Science - research, formulation, manufacturing discipline, quality standards, contemporary relevance.
- Center image/object can visually merge a mortar-and-pestle/herbs with laboratory glassware.
- Use a clean circular or split composition, not a technical infographic.
- Closing line: innovation should strengthen tradition, not replace it.

Section 5 - What We Believe

Translate the official story into a concise, premium value section.

- Every ingredient is selected with purpose.
- Every formulation is designed with respect.
- Every product carries a story rooted in Indian culture.
- Purity is a responsibility.
- Authenticity is our identity.
- Nature is our first choice.
- Use 4-6 quiet icon/text items over deep forest green or warm ivory.
- Avoid rewriting these beliefs into exaggerated marketing promises.

Section 6 - Our Vision

A spacious editorial section explaining where Greenfuel wants to go.

- Communicate that Greenfuel's vision extends beyond skincare.
- Preserve the aspiration to revive India's forgotten beauty traditions and transform them into premium, trustworthy products for modern families across the world.
- Emphasize that each application should feel like reconnecting with something familiar and deeply rooted in culture.
- Use a calm lifestyle visual showing modern living alongside botanical heritage.

Section 7 - More Than a Cosmetic

A typography-led statement section that reinforces the philosophy rather than selling a product.

- Beauty should nourish, not merely decorate.
- Skincare should respect the body, not burden it.
- Innovation should strengthen tradition, not replace it.
- Use large serif typography, generous negative space, and a slow scroll reveal.
- This section can be mostly text - do not overdecorate.

Section 8 - Closing Brand Manifesto

Close the About journey with the strongest official brand message.

- Greenfuel is a tribute to India's timeless wisdom.
- Ancient rituals meet modern science.
- Authenticity meets innovation.
- Purity meets performance.
- Final lockup: Rooted in Tradition. Refined by Science. Inspired by Nature.
- Optionally add a restrained CTA: Explore Greenfuel / Discover Our Ingredients / Shop the Ritual.

Section 9 - Global Footer

Reuse the same premium footer across the site.

- Links: Shop, Shop by Concern, Ingredients, About Us, Knowledge Centre, Contact, policies.
- Deep forest/charcoal background with warm ivory text.
- Keep the footer clean; do not add sale-first promotional messaging.

3. Ready-to-Use Content Direction

Use the official brand story as the factual source. The following wording is structured for page implementation while preserving the supplied meaning.

Hero Intro

About Greenfuel

Where Tradition Becomes Tomorrow

Greenfuel is a tribute to India's timeless wisdom - a place where ancient rituals meet modern science, authenticity meets innovation, and purity meets performance.

Philosophy

Rooted in Tradition. Refined by Science. Inspired by Nature.

Greenfuel brings together Ayurvedic wisdom, traditional Indian beauty rituals, and botanical ingredients trusted across generations, refining them through modern research, advanced manufacturing practices, and quality standards for today's world.

Our Story

A Journey Back to Our Roots

Long before beauty became a shelf of complex formulations, Indian homes relied on turmeric, sandalwood, hibiscus, coconut oil, aloe vera, and carefully prepared herbs. Generations changed. Fashion changed. Technology changed. But these traditions remained timeless. That realization became the birth of Greenfuel.

Mission

Why choose between tradition and science?

Greenfuel was created with a larger purpose: to reconnect modern lifestyles with India's authentic heritage of natural wellness and beauty, while making those traditions relevant to contemporary life.

Belief

More Than a Cosmetic

When someone chooses Greenfuel, they are not simply buying a cosmetic. They are embracing a philosophy: beauty should nourish, skincare should respect the body, and innovation should strengthen tradition rather than replace it.

4. Scroll-Triggered Animation Guidance

The About page can be more cinematic than the Shop page, but motion must remain slow, elegant, and editorial. Use GSAP + ScrollTrigger only if already available in the project; otherwise use IntersectionObserver and CSS transforms.

Section	Recommended motion
Hero	Background scale 1.04 -> 1.00, headline masked reveal, copy fade-up, very subtle botanical parallax.
Philosophy	Image moves 12-20px vertically while text reveals in sequence; pillars stagger once.
Our Story	Dark text panel can remain briefly sticky while the visual slowly changes position/scale.
Tradition x Science	Left/right visual halves move toward a central balance point; avoid fast morphing.
What We Believe	Icon/value items reveal in a soft stagger, around 60-90ms apart.
Our Vision	Image parallax + copy reveal; no dramatic pinning required.
More Than a Cosmetic	Large statements reveal one line at a time based on scroll progress.
Closing Manifesto	Slow opacity + letter/line reveal; final brand lockup appears last.

- Respect prefers-reduced-motion.
- Use transform and opacity where possible.
- Do not use bouncing, neon glows, fast spins, exaggerated 3D, or constant floating motion.
- Keep scrolling responsive even while images animate.
- Clean up ScrollTrigger/observer instances on component unmount.
- Animations should enhance the narrative, never delay navigation or button clicks.

5. Responsive Layout Guidance

Viewport	Behavior
1440-1920px	Large editorial split sections, full-width cinematic hero, generous 80-120px section spacing.
1024-1439px	Maintain two-column layouts with reduced gaps and slightly smaller typography.
768-1023px	Convert some split layouts into 55/45 or stacked sections; reduce sticky/pinned motion.
430-767px	Stack image then text; keep hero text readable; 50-72px section spacing; reduce parallax range.
360-429px	Single-column layout, simplified animation, no horizontal overflow, comfortable line lengths.

- Mobile should still feel editorial, not like compressed desktop.
- Avoid text overlays on visually busy images unless contrast remains excellent.
- Use minimum ~44px tap targets for CTAs.
- Keep headings balanced; avoid extremely long single lines on mobile.
- Lazy-load below-the-fold imagery and preserve aspect ratio to avoid layout shift.

6. Suggested React Component Structure

```
AboutUsPage
|-- AboutHero
|-- BrandPhilosophy
|-- OurStoryRoots
|-- TraditionScienceBalance
|-- BrandBeliefs
|-- BrandVision
|-- MoreThanCosmetic
|-- ClosingManifesto
`-- GlobalFooter
```

Implementation rules

- Use reusable section primitives for image/text split layouts and reveal animations.
- Do not hard-code animation logic directly into every paragraph if a shared reveal component can handle it.
- Keep page copy in a content object/JSON where practical so the client can update text later.
- Preserve the global navbar and footer already used by the Greenfuel site.
- Do not add AI Advisor to this page or navbar.
- Do not introduce new backend requirements; this About page should be frontend/content driven.

7. Temporary Assets, SEO & QA

Temporary assets

- Use any suitable dummy image from the local assets folder for unfinished visuals.
- Prefer botanical, Ayurvedic ritual, copper, herbs, warm architecture, Indian lifestyle, or laboratory imagery that matches the section.
- Do not use rustic village scenes, oversaturated bright green imagery, or generic spa stock photography if alternatives exist.
- Do not overwrite original brand assets.
- Centralize image paths so final client images can be swapped quickly.
- Use meaningful alt text and test object-position on mobile.

SEO

- Use one H1: About Greenfuel.
- Keep section hierarchy semantic with H2/H3 headings.
- Suggested meta title: About Greenfuel | Tradition Meets Modern Science
- Suggested meta description should describe Greenfuel's Ayurvedic heritage, botanical inspiration, and modern scientific approach without unsupported claims.
- Use crawlable links for CTAs to Ingredients, Shop, and Knowledge Centre.

Final QA checklist

- About Us is highlighted correctly in the global navbar.
- All official brand-story ideas are preserved without invented facts.
- No AI Advisor appears.
- No fake founder details, founding date, awards, certifications, statistics, or clinical claims are introduced.
- All dummy visuals come from local assets and are replaceable.
- Animations work without layout jumps or scroll locking.
- No horizontal overflow at 360, 390, 430, 768, 1024, 1440, and 1920px.
- All text remains readable on image backgrounds.
- Page works with prefers-reduced-motion.
- Footer/header match the rest of the Greenfuel site.

Final direction: the About Us page should feel like entering Greenfuel's philosophy - a quiet, modern Indian story where heritage, nature, and contemporary science exist in balance.
