

GREENFUEL

React.js E-commerce Homepage

Implementation + Scroll-Triggered Animation Specification

CORE BRAND DIRECTION

Minimal. Elegant. Scientific. Authentically Indian. The experience should feel like entering a digital Ayurvedic wellness and botanical research studio - not a normal cosmetic shop.

Rooted in Tradition. Refined by Science. Inspired by Nature.

Development note: use temporary/dummy images from the local project assets folder until final approved product and lifestyle images are supplied.

APPROVED VISUAL DIRECTION

Homepage Layout Reference

Use this visual as the composition and section-order reference. The implementation should preserve the calm editorial rhythm, warm earthy palette, premium spacing, and long-form vertical storytelling.

GLOBAL RULES

Design + Development Rules

TEMPORARY IMAGE RULE

For now, use any suitable dummy image already available inside the React project assets folder (for example /src/assets, /assets, or the existing project image folder). Do not use external hotlinked images. Keep all image imports easy to replace later.

Visual system

- Primary palette: Matte Sand, Warm Ivory, Deep Forest Green, Burnt Terracotta, Copper, Dark Charcoal.
- Accent palette: Saffron, Olive, Natural Linen. Avoid bright green.
- Typography: luxury/editorial serif for large headings + minimal sans-serif for body, navigation, UI labels and product information.
- Use generous whitespace and calm spacing. Avoid crowded cards, excessive borders, loud gradients, neon colors or flashy effects.
- Use premium material cues: stone, linen, wood, glass, copper, herbs, water, soft shadows and morning light.
- No discount popups. No aggressive promotional banner. No auto-opening modal on first visit.

Motion system

- Recommended stack: GSAP + ScrollTrigger for complex scroll choreography. Use lightweight CSS/Framer Motion only for small UI transitions where appropriate.
- Default motion duration: 0.8s-1.4s for section reveals; 1.5s-3s for ambient/parallax movement.
- Use ease-out or smooth custom easing. Avoid bounce, elastic, fast spins or distracting motion.
- Do not hijack native scrolling. Keep normal browser scroll behavior and use pinned/sticky sections selectively.
- Respect prefers-reduced-motion: reduce or disable parallax, pinned transitions and decorative motion for accessibility.
- Lazy-load below-the-fold media and keep animation transforms GPU-friendly (transform/opacity where possible).

Responsive behavior

- Desktop: cinematic wide compositions, selective sticky/pinned storytelling and horizontal ingredient sequences.
- Tablet: shorten pin durations, reduce decorative layers and maintain readable text width.
- Mobile: vertical storytelling, thumb-friendly controls, swipeable product/routine carousels, minimal parallax and no oversized pinned sections that trap the user.

Header + Minimal Brand Strip

Create a restrained premium header that stays visually quiet and lets the storytelling lead.

Content / structure

- Optional thin brand strip: “Rooted in Tradition. Refined by Science. Inspired by Nature.”
- Logo on the left.
- Navigation: Home, Shop, Ingredients, Our Story, Knowledge Centre, Contact.
- Right-side icons: Search, Account, Wishlist (optional), Cart.
- Use a transparent/soft ivory header over the hero, then transition to a solid warm-ivory or frosted background after scrolling.

Scroll-triggered animation

- At page load, fade header in after the hero media is visible.
- After 80-120px scroll, reduce header height slightly and add subtle backdrop blur/shadow.
- Logo and nav should never bounce or scale aggressively.

SECTION 01

Cinematic Hero - Ancient Wisdom. Modern Science.

The first screen should communicate Greenfuel as a premium Ayurvedic-science brand before it behaves like an online store.

Layout

- Full viewport height on desktop (approximately 90-100vh).
- Use a cinematic lifestyle image/video: Indian woman with natural skin, morning light, Ayurvedic herbs, copper/wood/linen setting, minimal makeup. Product may appear in the foreground but should not dominate like a standard ad.
- Left editorial copy block with large serif typography. Keep line length short.
- Primary CTA: “Explore Rituals”. Keep only one strong CTA in the hero.
- Subtle scroll cue at the bottom-right or bottom-center.

Copy direction

HERO COPY

Ancient Wisdom.
Modern Science.

Where Tradition Becomes Tomorrow...

Scroll-triggered animation

- Hero background/image: very slow 1.03-1.08 scale over the first viewport of scroll.
- Headline lines reveal with masked upward motion and opacity stagger.
- Foreground herbs/copper/product can move at different parallax speeds (maximum 15-30px difference).
- As hero exits, slightly darken or soften the background and fade the scroll cue.
- Do not turn this into a fast slider. If video is used, autoplay muted, loop gently and provide a static fallback image.

SECTION 02

What is Greenfuel?

Explain the brand philosophy using a premium editorial split layout that visually connects Ayurveda and science.

Required content

CORE STATEMENT

“Every Greenfuel formulation combines modern dermatological science with the timeless wisdom of Ayurveda.”

- Left side: heading + short philosophy copy.
- Right side: 2-3 editorial image panels showing herbs/traditional preparation, laboratory glass/scientific extraction and copper/Indian material cues.
- Optional floating quote card: “Ancient rituals meet modern science.”

Scroll-triggered animation

- Text appears line-by-line while the image collage reveals with masked clipping.
- Individual image panels move at slightly different speeds to create depth.
- Quote card floats upward 20-30px as the user enters the section, then settles.

SECTION 03

Shop by Categories - Discover Your Greenfuel Ritual

Use only the nine real Greenfuel categories. Do not invent or substitute broad categories such as Face Care, Body Care or Gift Sets.

Categories - exact list

Hair Mask	Face Mask	Ubtan
Face Serum	Scalp Serum	Face Wash
Moisturizing Cream	Roll-On	Inhaler

Layout direction

- Desktop option A: 5 cards on the first row + 4 centered on the second row.
- Desktop option B: a premium horizontal editorial strip with 4-5 cards visible at once.
- Each card: temporary category image from assets folder, category name, subtle “Explore” affordance.
- Keep cards image-led, with minimal borders and gentle warm-ivory/sand backgrounds.

Scroll-triggered animation

- Stagger category cards upward 18-24px with opacity as they enter viewport.
- On hover: image scale 1.02-1.04, text/arrow shift 4-6px, subtle shadow lift.
- If horizontal scroll is used, let the section move with native wheel/touch interaction; avoid forced rapid scroll snapping.

SECTION 04

Ingredient Journey

Turn ingredient education into a signature scroll story instead of a static icon grid.

Ingredient set from the client brief

- Bhringraj
- Bakuchiol
- Acetyl Zingerone
- Saffron
- Brahmi
- Moringa
- Vetiver
- Ashwagandha
- Neem
- Tulsi

Journey structure for each ingredient

1. Origin
2. Ayurvedic significance / heritage
3. Scientific research
4. Key benefits
5. Greenfuel products using the ingredient

Scroll-triggered animation

- Desktop: pin the section for a controlled horizontal ingredient journey. Each ingredient card moves into the center while the progress line advances.
- Botanical image can rotate 3-6 degrees or scale subtly as each ingredient becomes active.
- Reveal the five journey labels sequentially using short 100-160ms staggers.
- Mobile: disable long pinning; use a swipeable ingredient carousel with vertical content beneath each active ingredient.
- Use temporary botanical images from assets folder. Final ingredient illustrations/3D models can replace them later.

SECTION 05

Shop by Concern

Help customers shop by the problem or wellness need they recognize, while keeping the actual product categories separate.

Concerns - exact brief list

Skin Brightening**Hair Fall****Pigmentation****Anti-Ageing****Hydration****Dandruff****Body Odour****Dry Skin****Sensitive Skin****Dark Circles**

Animation guidance

- Use circular or softly rounded concern visuals that reveal in two staggered rows.
- On hover/tap, reveal a one-line description and “View Solutions” arrow.
- Use small botanical line-drawing motion or parallax only; keep the section calm.

SECTION 06

Signature Ritual Product Story - Aura Ubtan

Use one flagship product as a cinematic bridge between storytelling and shopping.

Suggested featured product

AURA UBTAN FACE MASK POWDER

Use the approved/current product name and product pack reference. Any benefits, claims, price, ingredient percentages or clinical statements must come from client-approved product data before launch.

Layout direction

- Large product pack on the right/center with surrounding ingredient imagery.
- Left content: product name, one-line ritual position, 3-4 short highlights and CTA to product detail page.
- Background should feel tactile: warm ivory, saffron, copper, rose/sandalwood/khus cues - not flat white.

Scroll-triggered animation

- Product pack rises 30-50px and scales from 0.96 to 1.00 as section enters.
- Ingredient elements drift in on separate layers with slow parallax.
- If a transparent PNG is available later, add a very subtle 3D tilt/rotation, maximum 6-8 degrees.
- CTA and feature icons reveal after the product settles.

SECTION 07

Best Sellers

Introduce straightforward e-commerce after the user has understood the brand and ritual philosophy.

Suggested current product references

- Aura Ubtan Face Mask Powder
- Waterless Face Wash Spray
- Sparsh Moisturizing Cream
- Under Arm Roll-On
- Herbal Natural Inhaler
- KeshVruddhi Herbal Hair Mask

DATA RULE

Use dummy product cards and placeholder prices only if needed for layout testing. Do not publish unverified price, review count, claim, rating or certification as final content.

Animation guidance

- Use a horizontal carousel on desktop with 4-5 visible cards; 1.2-2.2 cards on mobile.
- On scroll into view, cards reveal with a short stagger.
- On hover: product image scale, quick-view/quick-add controls fade in, and card lifts slightly.
- No large popups. Quick actions should stay lightweight.

SECTION 08

Tradition x Modern Science

Create a signature split-screen section that visually merges Indian Ayurvedic heritage with contemporary laboratory research.

Layout

- Left panel: Ayurveda - herbs, mortar/pestle, copper, traditional preparation, warm shadows.
- Right panel: Modern Science - glassware, botanical extraction, clean laboratory textures, transparent materials.
- Center bridge: "Tradition x Science".
- Supporting message: "Rooted in Tradition. Refined by Science. Inspired by Nature."

Scroll-triggered animation

- Start with two distinct 50/50 panels.
- As the user scrolls through the section, slowly move both panels inward and blend the central divider/overlay.
- Center statement fades in only after the panels begin to converge.
- Keep the transition subtle and premium; do not use a dramatic wipe or fast split animation.

SECTION 09

AI Skin & Hair Advisor

Present a personalized consultation experience that can start as a guided questionnaire and evolve into AI/selfie analysis later.

Initial version - recommended for build now

- Use a guided questionnaire UI first. Do not require true AI/selfie processing in the first homepage build unless backend scope already exists.
- Concern options: Pigmentation, Acne, Dryness, Oiliness, Wrinkles, Hair Thinning.
- Output UI can preview: Morning Routine, Night Routine, Products, Recommended Duration.
- Primary CTA: “Start Your Assessment” or “Discover Your Ritual”.

Scroll-triggered animation

- Animate concern chips/cards in with a clean stagger.
- As the user selects a concern, move the selected item into a highlighted state and reveal the next step without page reload.
- Use horizontal step progress on desktop, compact top progress on mobile.
- Keep this section functional even with reduced motion.

SECTION 10

Digital Herbarium

Make Greenfuel feel like a botanical museum and research library, not simply a product catalogue.

Homepage preview

- Use a Deep Forest Green or dark charcoal background.
- Feature one active botanical specimen at a time with Latin/common name, origin, Ayurvedic significance, active phytochemicals/clinical evidence placeholders, and products containing it.
- Example active entry: Ashwagandha / *Withania somnifera* (or another client-approved botanical).
- CTA: Explore the Digital Herbarium / View Ingredient Library.

Scroll-triggered animation

- Desktop: sticky botanical artwork/model with content cards changing as the user scrolls.
- Use slow 3D-like rotation only if proper assets exist later. For now, use a dummy botanical image from assets and apply a very subtle scale/rotate motion.
- Decorative line art can trace/reveal around the specimen as it becomes active.
- Mobile: no 3D pin trap; use swipe or stacked cards.

SECTION 11

Greenfuel Knowledge Centre

Establish Greenfuel as an education and research-led wellness brand.

Topic categories

- Ingredient Science
- Ayurveda
- Dermatology
- Hair Science
- Nutrition
- Lifestyle
- Clinical Research
- Doctor Interviews

Layout + animation

- Use editorial story cards with wide imagery and minimal metadata.
- Desktop can show 4-6 cards in a horizontal strip or masonry-like editorial grid.
- Reveal cards in staggered groups; image hover scale should remain subtle.
- Use dummy editorial images from the assets folder for now.

SECTION 12

Packaging Experience

Show that the Greenfuel ritual continues after checkout and into the unboxing experience.

Elements from client brief

- Soft fragrance
- Ayurvedic message card
- Seed paper
- QR code linking to a “how it was made” video
- Founder message

Scroll-triggered animation

- Use an open-box editorial image on one side and the five experience elements on the other.
- Animate the five elements one-by-one as the box image moves slightly upward.
- Optional later enhancement: layered unboxing sequence with individual package components sliding out on scroll.
- For now, use any suitable dummy packaging/unboxing image from assets.

SECTION 13

Join the Greenfuel Circle + Footer

End with a calm membership/newsletter invitation and a premium deep-green footer.

Greenfuel Circle block

- Heading: “Join the Greenfuel Circle”.
- Short positioning: modern Ayurvedic wellness, rituals, new launches and botanical knowledge.
- Email field + simple submit arrow/button.
- Do not use points or detailed loyalty mechanics on the homepage unless that feature is being implemented now.

Footer navigation

- Shop / Categories
- Ingredients / Digital Herbarium
- Our Story
- Knowledge Centre
- Contact
- Account / Order-related links
- Shipping & Delivery, Returns & Refunds, Privacy Policy, Terms & Conditions
- Social icons and contact information when client confirms them.

Animation guidance

- Circle block fades up with a very soft background texture motion.
- Footer should not have heavy animation. At most, reveal columns with a short stagger and animate links with underline/arrow micro-interactions.

Recommended ScrollTrigger Architecture

IMPORTANT

The goal is premium storytelling, not maximum animation. Motion should support hierarchy and product/ingredient understanding. Everything slow. Nothing flashy.

Suggested sequence

Order	Section	Motion intent
1	Hero	Intro reveal + slow image/video scale + micro parallax.
2	What is Greenfuel	Editorial split reveal and layered collage parallax.
3	Categories	Staggered card reveal; hover micro-interactions.
4	Ingredient Journey	Primary pinned/horizontal story section on desktop.
5	Shop by Concern	Two-row stagger + tap/hover reveals.
6	Aura Ubtan	Product pack + ingredient layer reveal.
7	Best Sellers	Lightweight carousel with entry stagger.
8	Tradition x Science	Split panels converge while scrolling.
9	Advisor	Interactive questionnaire; minimal scroll animation.
10	Digital Herbarium	Sticky specimen with changing content.
11	Knowledge Centre	Editorial cards reveal in groups.
12	Packaging	Unboxing composition + sequential experience icons.
13	Greenfuel Circle/Footer	Soft fade-in only.

Component & Asset Guidance

Suggested component breakdown

- Header / BrandStrip
- HeroCinematic
- BrandPhilosophy
- CategoryGrid
- IngredientJourney
- ConcernGrid
- SignatureProductStory
- BestSellersCarousel
- TraditionScienceSplit
- SkinHairAdvisor
- DigitalHerbariumPreview
- KnowledgeCentre
- PackagingExperience
- GreenfuelCircle
- Footer

Temporary asset rule - repeat

USE LOCAL DUMMY ASSETS FOR NOW

Every image/video slot should use a temporary local file from the existing assets folder until the client provides final approved images. Keep image references centralized (for example a data/config file or clearly named imports) so the final replacement is fast and does not require layout rewrites.

Do not hardcode final claims

- Do not publish unverified “100% natural”, “chemical free”, medical/dermatological claims, clinical results, quantitative water-saving claims, review counts or sales statistics unless client-approved source data is supplied.
- Prices and product availability should come from the e-commerce data/backend, not static marketing graphics.
- Keep copy, products, ingredients, concerns and categories data-driven where practical.

Performance + QA

- Target smooth 60fps transforms on modern desktop and stable scrolling on mid-range mobile devices.
- Compress images, use modern formats when possible, and lazy-load below-the-fold assets.
- Avoid running continuous requestAnimationFrame loops when the section is not visible.

- Test: desktop 1440+, laptop 1280, tablet 768-1024, mobile 360-430 widths.
- Check reduced motion, keyboard navigation, visible focus states, alt text and readable contrast.
- Do not let pinned sections make the page feel excessively long; keep each pinned sequence purposeful.

FINAL ACCEPTANCE CHECKLIST

Homepage must satisfy all of the following

- ☐ Uses the Greenfuel earthy luxury visual system and avoids bright green.
- ☐ Feels minimal, elegant, scientific and authentically Indian - not rustic/village and not generic luxury.
- ☐ Contains every homepage section in this specification in the same overall order.
- ☐ Shop by Categories contains only: Hair Mask, Face Mask, Ubtan, Face Serum, Scalp Serum, Face Wash, Moisturizing Cream, Roll-On, Inhaler.
- ☐ Shop by Concern remains a separate section with the 10 client-specified concerns.
- ☐ Ingredient Journey and Digital Herbarium feel educational/research-led, not like ordinary product grids.
- ☐ Uses calm scroll-triggered animation; no flashy/bouncy effects.
- ☐ Uses dummy images from the local assets folder for all currently missing final imagery.
- ☐ Responsive experience is vertical and thumb-friendly on mobile.
- ☐ No unverified marketing, medical, scientific, pricing or statistical claims are treated as final facts.
- ☐ Header/footer, product cards and interactive elements remain usable with reduced motion.
- ☐ The site can later swap in final product/lifestyle assets without changing the section architecture.

GREENFUEL

Where Tradition Becomes Tomorrow...
